Section III – Indian Economy – Planning- Rural Development (8 units)

1. **Indian Economy** – Post independence growth - experience of agriculture, industry and tertiary sectors, growth and distributive justice. Poverty and inequality, Growth of Karnataka Economy during the plan era, growth and sectoral changes and linkages in the State Economy.
2. **India and International economic relations** – Growth and trade – volume, composition and direction of exports and imports, domestic and foreign capital in economic development, changes in India’s foreign trade policy, balance of payments and foreign exchange. Karnataka’s exports – volume, composition, and direction.
3. **Development patterns** and disparities among regions and between rural and urban areas, public policies to mitigate disparities, prospects and problems of Special economic zones. Development disparities in Karnataka and public policies, Redressal of development disparities. Regional development boards.
4. **Planning – Planning goals**, objectives and approaches, achievements and failures of five year plans (I to VII Five year plans). Development plans under the new economic policies regime (VIII Five year plan onwards). Planning in Karnataka.
5. **Decentralization** – pros and cons of top-down planning and bottom-up planning, planning mechanism and experience in Panchayathi raj institutions, planning and capacity building, planning and financing. Decentralized planning in Karnataka, Resource mobilization and devolution. District Planning Committee, State finances and local finances. State finance commission.
6. **Rural Development** – Importance of agriculture in the national economy, Gandhian approach to rural development and land reforms, size of farms and productivity, problems of irrigation and dry land farming, food security, rural credit, agricultural marketing, agricultural labour, rural industries and employment. Agricultural problems in Karnataka, Rural Economic infrastructure (Energy, Irrigation, Transport, Communication, Markets), Rural Social Infrastructure - Housing, Drinking water, Sanitation & Drainage, Rural Health systems and their delivery. Development of Economic and Social infrastructure in Karnataka, Rural markets in Karnataka. Rural housing and health care schemes in Karnataka.
7. **Rural Development Initiatives** – Poverty Alleviation-cum-Employment generation Programmes, Five Year Plan and inclusive growth, rural financial institutions, Development and conservation of common property resources in rural areas – village grasslands and woods, water bodies, Provision of urban amenities in rural areas (PURA).

Rural Development schemes in Karnataka, self help groups and micro finance institutions in Karnataka, External assistance for rural tank rejuvenation, drinking water, sanitation and health care in Karnataka.

8. **Data Collection Analysis- Interpretation-** Collection, Interpretation and Appreciation of Statistical Data- Study of Graphs and Charts:- Bar Graphs, Line Graphs and Pie Charts- Problems Based on Tabular and Diagrammatical Data- Data Sufficiency in Statistics- Problems Based on Probability- Permutations and Combinations-Quantitative Aptitude – Number Sequences, Series, Averages, Number Systems, Ratio and Proportion, Profit and Loss, Percentages, Time and work, Speed-Time-Distance, Simple Interest, Analytical and Critical Reasoning, Reading Comprehension

PAPER - III General Studies 2

Section I - Physical Features and Natural Resources

GEOGRAPHY OF THE WORLD

1. **Lithosphere**-Place of Earth in the Solar System, Rocks, Earthquakes, Volcanoes, Plate tectonics, Agents of Erosion. **Atmosphere** - Structure and Composition –Elements of Climate and weather – Broad Climatic types. **Hydrosphere** - World Oceans Salinity – Ocean currents and Tides – Ocean Deposits.
2. **Physiography of Continents and Demographic distribution** - Mountains, Rivers, Forests, Grass lands, Deserts, Human Races, Population Change, distribution and demographic transition, density, sex ratio, quality of life, life expectancy, literacy, standard of living and migration.

GEOGRAPHY OF INDIA

3. **Physiography of India** – Climate, Rivers, Soil, Natural vegetation. Mineral Resources: Iron ore and Manganese - Copper and Bauxite Coal, Petroleum and Natural Gas, Nuclear Deposits. Major crops-, Distribution and production of cereals, millets, oilseeds, plantation crops, commercial crops. Indian Demography – Growth, Composition, Distribution, Density, Human Development Index. Demographic Database.
4. **Industrial Planning and Development** :_Growth and Distribution of Major, Medium, Small and Tiny Industries – Industrial regions of India. Industrial infrastructure - Railways, Roads, and Ports. Backward regions and rural industrialisation. Regional Planning and Development -Tribal and hill areas, drought prone areas, command areas and river basins. Classification of Towns and Cities. Urban Structure.

GEOGRAPHY OF KARNATAKA

5. **Physiographic divisions** – Climate, Rivers, rainfall distribution, Natural vegetation and Soil. Agriculture and Agro climatic regions, Major crops, Plantation and commercial crops of Karnataka. Mineral Resources of Karnataka. Sources of Power (Hydro, Thermal, Solar, Nuclear and Wind). Major, Medium and Small Scale industries, Agro based Industries. Transportation and Communication Systems in Karnataka. Geographic information system .
6. **Urban Land use Policy and Urbanisation** - Demographic features Literacy and Urbanisation. Population Problems and policies, Literacy, City classification and urban spheres of influence, rural urban fringe, problems of urban growth. Land use, Town planning, slums and urban housing. Intra and Inter regional trade and the role of rural Market centers

Section II - Overview of Indian Constitution (7 units)

1. **Nature of the Constitution-** Constitutional developments, , salient features of Constitution: Preamble, Directive Principles of State Policy, Indian federation, etc.,
2. **Fundamental rights** – Right to Equality, Right to Freedom, Right against exploitation, Right to freedom of religion, Cultural and Educational rights, Right to Constitutional remedies. Reasonable restrictions - Provision for schedule caste, schedule tribe and minorities, Reservations for SC/ST and OBC's, preventions of SC/ST Atrocities Act, National and State SC/ST Commission
3. **Distribution of Legislative powers** – Between the Union and the State, Administrative and Financial relations between the union and the states, Powers and functions of constitutional bodies. Powers and Functions – Governor, Council of Ministers and Cabinet, Judicial remedies.
4. **Unicameral and Bicameral legislations** – Functions and crisis of accountability, delegated legislation, Legislative procedure and committees of legislature, legislative and judicial control over the delegated legislation, judicial review of administrative action. Comptroller and Auditor General of India, Attorney General of India.
5. **Important Amendments of the Constitution** – Basic structure theory, Emergency provisions and decentralization, Panchayathi raj, Seventy-third and Seventy-fourth amendments etc.,
6. **Welfare mechanism in India** – Directive principles of State policy and their relationships, Right to property, Election Commission, Public Service Commissions, Women's commission, National and State Minorities

commission, Backward Commission, Human Rights Commission, Information Commission, Finance Commission, Planning Commission, National Development Council.

7. Services under the Union and State – Constitutional provisions relating to Government and public servants.

Section III- Public Administration and Management – International Relations (7 Units)

- 1. Private and Public Administration** – its role in society, Public Administration as an art and a science, New Public Administration and New Public Management. Responsive Administration. Difference between administration and management. Difference between public and private administration.
- 2. Structure of Organisation** – Personnel, Financial, Administrative Law, Maintenance of Law and Order, Administration for Welfare. Issues of Areas in Indian Administration. Development Administration.
- 3. Organisational Behaviour and Management Concepts;** Organisation structure, systems, Processes, Strategies, Policies and Objectives, Decision making, Communication, Centralisation, Decentralisation, Delegation of authority, Responsibility, Control.
- 4. Formal and informal Organisation,** – Functional management: Finance, HR, Marketing, Production, Leadership and Motivation.
- 5. Management Tools and Techniques:** Decision making under uncertainty, PERT & CPM, PIME, POSD-CORB, SWOT Analysis, Performance Standards and appraisal, PDCA Cycle, Personnel Policies, Manpower - Policy and Planning, Training and Development, Conflict Management, Management of change and development. Team Building, quality tools (Brain Storming, nominal group technique, pareto chart, fishbone diagram and process chart).
- 6. Administrative Reforms,** Ethics and Values in Public Service, Public Relations, Good Governance, Accountability and control, Program monitoring and evaluation, Lokpal and Lokayukta, Redressal of Citizens grievances, District Administration and Panchayathi Raj System, Law and Order and Development Functions, Development Programmes. Welfare Programmes for SC/ST and women. People's participation. Administrative Reforms Commissions - Central and State.
- 7. United Nations and Specialised Agencies,** Other International Organisations and Agencies - Origin and development of UNO – Role in International Relations, General Assembly, Security Council, Economic and Social Council, Trusteeship Council, International Court of Justice, UN and Peace Keeping Operations, UN and Disarmaments, Future of UN. Special Agencies like WHO, ILO, FAO etc., International Organisations like IMF, World Bank, ADB, WTO, EU, ASEAN, SAARC, AU, NATO, NAM, OPEC, G-8, IAEA, etc., Role of Developing countries in International Relations, India and her Neighbours. Etc.,

PAPER – IV General Studies 3

Section-I, Role and Impact of Science and Technology in Development of Indian, Information Technology In Public Domain

1. Basics of Science and Technology.

Classical and emerging areas of science and Technology (S&T)- Value Addition by Science & Technology- Current Science & Technology developments in India and Importance of Science & Technology as an engine for national development- Industrial development & Urbanization- National policy of Science & Technology ; changes in policy from time to time ; Technology missions- ICT: Basics Computers, Communication, Telephone and Television- Broadband, Internet, & Web-IT industries, BPO, economic & employment growth- E-governance, E-commerce & E-learning- IT& Rural applications, Digital divide & its prevention- Computers in Mass Media.

2. SPACE Science and Technology

- A brief history of global space programmes, and current space programmes.
- Space programme in India- INSAT, IRS systems, EDUSAT, and Chandrayana-1, Etc., and future programme.
- Application of Space technology in India with special references to Educational, Agricultural and Other Rural Developmental Activities.

3. Energy Resources

- Indian Energy scenario- Hydel, Thermal, Nuclear, & Renewable; their potential, harnessing & options.
- Importance of renewable resources- Solar, Wind, Small/ Mini/ Micro Hydel, Biomass, Waste based, Geothermal, Tidal, Hydrogen & Fuel cells.
- Enabling legislations, financial and procedural incentives, and business opportunities for investors.

4. Disasters, Pests and Pollution

- Climatic Change – floods, cyclone, tsunami, natural and manmade disasters and disaster management.
- Crop science in India, Fertilizers, Control of Pests and Crop Diseases.

- Safe Drinking water & supply.
- Sanitation and Waste disposal
- Urbanization, Industrialization, and Pollution control.

5. Related Perceptions

- Universalizing Science and Technology literacy;
- Technology with a Human Face
- Human Development Index (HDI)
- Contribution to Growth of GDP
- Facing Global competition
- Preservation & promotion of culture and indigenous knowledge

6. Knowledge Society

- Human capital, its power, imparting education, Skill, & Values.
- Role of Knowledge for Economic growth, Social development, Cultural enrichment & political empowerment.
- Achieving goals around Knowledge: Eradication of poverty; Universal primary education; Gender equality.

7. Rural Upliftment and Science & Technology

- Advance Infrastructure in Rural Areas, Establishing Physical, Electronic, Knowledge, & Economic Connectivity.
- Regional Language: Usage in ICT
- Horticulture: Hybrid seed production with R&D; Set up Fruit and vegetable processing plants, packaging & Marketing.
- Agro Food Processing: Forming village clusters and establishing Food Storage, Food Processing, and Food Packaging & Marketing.
- Bio-fuel cultivation and extraction
- Scientific Water harvesting.

Section II: Advancement and Modern Trends in Natural Sciences, Life Sciences, Agricultural Science, Health and Hygiene - (7 Units)

1. Natural Science

Plants - crop plants, forest species, medicinal and aromatic plants, usefulness of plants and human affairs (utility), photosynthesis, transpiration, harmful plants.

Common classification of animals - domestic and wild animals. Usefulness of animals and human affairs (utility).

Microorganisms: Common bacteria, virus, fungi and their beneficial and harmful effect on mankind.

2. Agriculture Science

Agriculture scenario and importance of agriculture in the national and state economy. Crop production and protection. Chemical Fertilizers and Vermi compost. Cost benefit and investment analysis of agricultural enterprises. Programmes for production and productivity enhancement - green, white, yellow, blue revolutions. Recent trends in organic farming and farm mechanization. Farming systems and sustainability. Agro-processing and agro-based industries. Post-harvest technology and value addition. Management of land and water resources.

3. Horticulture and Sericulture

Importance of Horticulture-floriculture, vegetables, fruits, plantation crops, spices, aromatic and medicinal plants. Hi- tech horticulture (green / poly house cultivation). Post-harvest management and value addition. Special promotional programmes for horticulture development.

Sericulture: Importance of sericulture in India and Karnataka, distribution of mulberry and non-mulberry sericulture (area, production and productivity across states), cocoon production.

4. Initiatives in Biotechnology

Concept of biotechnology, introduction and application of genetic engineering and stem cells research. Molecular breeding and marker assisted selection. Transgenic plants (genetically modified) and their beneficial and harmful effects on environment and society. Biotechnology in agriculture (bio-fertilizers, bio-pesticides, bio-fuels, tissue culture, cloning). Food bio-technology, food safety and microbial standards, food quality standards, food laws and regulations.

5. Animal Husbandry (veterinary, dairy and fishery sciences)

Importance of livestock in the national and state economy. Important exotic and Indian breeds of cattle, buffalo, sheep, goat, swine and poultry.

Milk production management and dairy development. Milk Cooperative Unions and their role in rural economy- AMUL, KMF.

Fisheries resources in India-Marine fisheries resources and potential, exclusive economic zone of India, coastal aquaculture and Mari culture. Inland water resources, commercially important fishes, responsible fishing. Ornamental fish production. Value addition of livestock products and quality control.

6. Agriculture development policies, programmes and trade

Salient Features of National and Karnataka state agricultural policies, Agriculture Price Policy, National Seed Policy, Agricultural Credit Policy, National Agricultural Research System (NARS). Farmers welfare programmes in India, Farm women development programmes, Agriculture under Five Year Plans, Development / strengthening of agricultural marketing infrastructure-Grading and Standardization, Crop Insurance Scheme-National Agricultural Insurance Scheme (NAIS), Weather Based Crop Insurance Scheme (WBCIS), Food Security, National Watershed Development Programme, Export potential of agriculture-horticulture-livestock products. Commercialization and globalization of agriculture- WTO, AoA (Agreement on Agriculture).

7. Health and Hygiene

Human - Digestive, circulatory, respiratory, excretory and reproductive systems. Allopathic, Indian System of Medicine, Naturopathy and Yoga (AYUSH), NRHM, National HIV Programme, Tuberculosis programme, P and SM (Preventive and Social Medicine), Diseases - Communicable diseases, epidemic diseases, endemic diseases, vector borne diseases. Basic knowledge of infections caused by different groups of microorganisms - Gastroenteritis, cholera, tuberculosis, malaria, viral infections, HIV, encephalitis, chikungunya, bird flu, dengue, preventive measures during outbreaks. Vaccines, introduction to immunity, production of DPT and rabies vaccine and hepatitis vaccine. Application of immunological methods in diagnosis. Health awareness Programme, Etc.,

Section - III Challenges and Issues of Development on Environment & Ecology (6 units)

1. Environmental Segments: Promotion and protection -forest conservation and environmentalism. Protection of Wild Life, Project Tiger, National parks and Sanctuaries, Impact of mining on forest and environment. Red Data Book: Endangered species, Eco Tourism and any other related current issues.
2. Natural Resources: Forest - Types and conservation of forest and forest resources. Water resources-flood and drought occurrences, water resource management, Land resources. Rain water harvesting, **Infrastructure development - Dams, Roads, Rails, Bridges, Industry**, urbanization and waste water management, acquisition and rehabilitation and other issues due to human interventions and any other related current issues.
3. Eco System and Biodiversity - Ecology - Basic concepts of ecology, Eco System, Food Chain, Biodiversity and its conservation, Hot spots of Biodiversity, threats to diversity, forest sustainable development and management, any other related current issues, IPR.
4. Environment Pollution and Solid Waste Management - Air Pollution, Water pollution, Soil Pollution, Noise Pollution and remedies. Solid waste Management- Types of Solid waste management, factors affecting the solid waste generation, Impact of solid waste, Recycling and reuse. Any other related Current issues. Environment protection Act, Air (prevention and control of pollution), water (prevention and control of pollution), water pollution Cess Act.
5. Role of Information Technology in Environment and Human Health - Global Environmental issues like Climate change, acid rains, global warming, wasteland reclamation, watershed management, watershed approach for sustainable development, linking of rivers, water crisis. Any other related current issues.
6. State community-civil society interface, Joint forest management system - community participation, Development, Displacement and Rehabilitation. Disaster Management, Sustainable Forest Development. Flood, earthquake, drought, tsunami, Global warming - Ozone layer, CFC, carbon credit.

PAPER - V General Studies 4

Section-I: Ethics

Essence, determinants and consequences of ethics in human action, dimensions of ethics, ethics in private and public relationships.

Ethics in public administration, status and problems, ethical dilemmas in government and private institutions, laws, rules, regulations and conscience as source of ethical guidance;

Accountability and ethical governance, strengthening of ethical and moral values in governance, ethical issues in international relations and funding, corporate governance;

Concept of public service, philosophical basis of governance, information sharing and transparency in government, Right to Information, codes of ethics, codes of conduct, citizen charters, work culture, quality of service delivery, utilization of public fund, challenges of corruption.

Human values- lessons from the lives and teachings of great leaders, reformers, administrators, Role of family, society, and educational institutions in inculcating values.

Section-II: Integrity

Integrity, impartiality and non- partisanship, objectivity, dedication to public service, empathy, tolerance and compassion towards the weaker sections,

Section-III: Aptitude

Aptitude and foundational values for civil service, Content, structure, function, its relation with thoughts and behavior, moral and political attitudes, social influence and persuasion,

Aptitude and foundational values for civil service, emotional intelligence and their utilities and application in administration and governance, contributions of moral thinkers from India and the world,

Case studies of above issues.
